

INTRODUCING ^{THE} WORLD'S FIRST SIX-DRUM PALLET FOR FOOD PROCESSORS

N55-IP Optimizes International Shipping and Storage Of Processed Foods

U.S. COEXCELL's N55-IP (International Pallet), optimizes the handling and storage of the company's durable and proven N55 plastic drums for international processed food shipping. The N55-IP is specifically designed to maximize the cubage utilization of a 40' High-Cube Shipping Container and safely hold six N55 drums while providing balance and stability during shipments.

N55-IP pallets neatly fill the width and length of shipping containers and safely assure 2-high stacking throughout. The N55-IP virtually eliminates the inefficiency of loading and unloading drums by hand. Increasing productivity as well as the amount of product per shipment, the N55-IP delivers cost savings for your operation.

VALUE ADDED BENEFITS:

- Plastic construction extends the product life and the number of uses, reducing packaging costs
- Made from High Density Polyethylene (HDPE) resin, the pallet provides added strength and is less permeable to bacteria than wood pallets
- Ideal for a food-processing environment, the N55-IP is the perfect accompaniment to the N55 drum
- When not in use, the pallets nest inside each other and save up to 40% in warehouse space
- 50% lighter than wood or steel pallets
- Easily handled with conventional warehouse equipment
- Built-in weep-holes prevent the accumulation of water when drums/pallets are stored outdoors and allow for water drainage when frozen product thaws
- Consistent product dimensions reduce the need for pallet sorting

PRODUCT SPECIFICATIONS

Construction:	Thermoformed HDPE with two galvanized steel reinforcement bars (1" x 2" x 68" rectangular tubes, .125" thick)
Dimensions:	46.5" x 85.5" / 118cm x 217cm
Pallet height:	12.6" / 32cm
Pallet weight:	86 lbs. / 39kg
Nesting height per pallet:	+3" / 7.6cm
Stacked drum and pallet height:	45" / 114cm
Forklift openings:	Two-way entry from wide side 7" x 4" / 18cm x 10cm
Color:	Black with colored marking to indicate forklift entry points

The N55-IP is specifically designed to maximize the cubage utilization of a 40' High-Cube Shipping Container. With colored markings indicating forklift entry points, the N55-IP is easily handled with conventional warehouse equipment.
