

An Employee Owned Company

OPENHEAD COEXCELL™ 55 GALLON DRUMS

The philosophy and products of COEXCELL offer the chemical industry a package that represents superior quality, outstanding performance and a genuine concern for the environment. Our patented COEXCELL plastic drum provides many value-added features that serve to fortify your company's image and marketing efforts. To make a real difference... choose COEXCELL.

PACKAGING APPLICATIONS:

COEXCELL open head plastic drums can be used for a wide range of applications including powders, dye chemicals, cleaning compounds, food concentrates and syrups, pastes and gels.

UN/DOT PACKAGING CERTIFICATION:

UN/DOT tested and certified for transport, per CFR Title 49 Sec 178, for Packaging Group II, and III Solids. Marking: 1H2/Y130/S/xx

CONSTRUCTION:

Certified high molecular weight, high density polyethylene used for drum body. COEXCELL drums can feature an inert liner wall, with no pigments or UV additives, to assure chemical product purity. FDA Complaint materials can be used upon request.

REMOVABLE COVER:

Patent designed injection molded ribbed drum cover with permanent urethane gasket provides for rugged use and an excellent seal. Covers are made from high impact purity polyethylene and are equipped with 2" and 3/4" flanges. Specially fitted galvanized steel closing ring with easy-to-use lever lock or bolt band secures cover to drum body.
